1 Introduction

This support document has been designed to help teachers understand key aspects of the new *Hebrew K–10 Syllabus* and to provide guidance for its implementation. The document shows how these aspects can be incorporated into teaching and learning programs, and how these programs are underpinned by the principles of *assessment for learning* (*Hebrew K–10 Syllabus*, p 65).

The document provides advice about constructing a program that will cover the scope of Hebrew for a stage. It sets out a process for planning and sequencing units of work, and developing teaching and learning activities.

The sample stage program plans and the sample units of work in this document demonstrate ways in which teachers can build a teaching and learning program and develop units of work to ensure coverage of the scope of the syllabus.

The document contains two sample units of work:

Stage 4 unit (100 hours mandatory study)

- **Eating and Drinking:** Learning in this unit focuses on developing the knowledge, understanding and skills that will enable students to discuss eating and drinking in a variety of contexts. Communicative activities include discussing likes and dislikes regarding food and drink, creating menus, writing surveys, and ordering food and drink in a restaurant.

Stage 5 unit (elective course – 100 and 200 hours)

- **Special Occasions – A Birthday Party:** Learning in this unit focuses on developing students' knowledge, understanding and skills within the context of planning a birthday party for a friend. Communicative activities include designing the birthday party invitation, deciding what people are to bring to the party, shopping for clothes, and gathering opinions about gift ideas.

These sample units can be used as models for planning units of work. They include:

- relevant outcomes and content
- assessment activities that have been designed and integrated into the units of work
- different types of possible feedback
- a variety of teaching and learning experiences
- opportunities for student reflection.

An assessment activity from each unit has been selected to show how assessment can fit into teaching and learning sequences. They are described in some detail to illustrate the process of *assessment for learning*. Teachers would not provide this level of detail in day-to-day classroom situations. The units of work and activities may be modified or amended to suit the needs, interests and abilities of students.

For a small percentage of students with special education needs who are undertaking Life Skills outcomes and content, support materials will be provided which will assist in the development of a meaningful and relevant program of study related to the *Hebrew K–10 Syllabus*. Units of work adapted for students undertaking Hebrew Life Skills will be included in a consolidated document that will be distributed to schools early in 2004.

2 Establishing a Scope and Sequence Plan

The acquisition of a language is a cumulative process that can be represented as a spiral that increases in breadth and depth of knowledge, understanding and skills as students experience a language through each stage of learning, visiting and revisiting themes, topics, structures and notions.

A fundamental step in the design of effective teaching and learning programs is the establishment of a scope and sequence plan. The scope and sequence plans provide overviews of units of work that may be taught in Stages 4 and 5 in Hebrew, with details about placement, sequence and duration.

A number of factors should be considered when establishing a scope and sequence plan.

Syllabus requirements

Essential syllabus content consists of a mandatory 100 hours study of one language in one continuous 12-month period between Years 7 and 10, but preferably in Years 7–8. The mandatory course, consisting of Stage 4 outcomes and content, is a requirement for the award of the School Certificate.

Further considerations

When designing a scope and sequence plan, teachers also need to consider:

- the specific needs, interests and abilities of students and/or areas of community significance
- the most effective use of existing and available resources
- the previous learning experiences and language backgrounds of the students
- the provision for students of a range of experiences throughout the stage of learning that increase in challenge and level of sophistication.

The syllabus content is expressed in the form of *learn about* and *learn to* statements derived from the syllabus outcomes. These statements form the basis for planning programs of study and units of work that will enable students to maximise their learning in Hebrew and demonstrate the outcomes in a range of learning contexts. The themes and topics of these learning contexts will be determined by the classroom teacher, taking into account the needs, interests and abilities of students, and the resources and facilities of the school and its community.

A scope and sequence plan should comprise themes and topics that are drawn from everyday situations within and beyond the classroom, and that enable students to develop communicative skills within the cultural context of Hebrew-speaking communities. The following list of suggested themes and topics is not exhaustive, but it will serve as a guide for teachers when selecting and grouping appropriate themes and topics. It is not expected that all the suggested themes and topics would necessarily be covered in Stages 4 and 5.

Suggested themes and topics

About me, about you	Music
After school activities	Our community
Daily routine	Our local area
Eating and drinking	Part-time jobs
Entertainment	Parties
Family	Pets
Festivals	Restaurants
Finding the way	School life
Future plans	Seasons and weather
Getting help	Shopping
Health and fitness	Sightseeing
Hobbies	Special occasions
Holidays	Special outings
House and home	Sport
Lost and found	The environment
Making arrangements	The weekend
Making friends	Transport
Meeting people	Travel

2.1 Sample Stage 4 Scope and Sequence Plan

The sample scope and sequence plan below is based on the mandatory 100-hour course and is a model that could be followed by teachers.

Programming that integrates the essential content in a variety of units of work will enable teachers to cover the scope of the content within the mandatory hours. A unit of work will not necessarily cover all the content, but it is recommended that each unit be designed to address at least some content from each Stage 4 outcome.

When planning and programming, teachers may need to transfer outcomes and content across stages to ensure that the needs of all students are addressed, taking into account the multiple entry points of second language learners, and the varying degrees of ability of background speakers.

Weeks	1	2	3	4	5	6	7	8	9	10
Term 1	Unit: About Me, About You					Unit: Making Friends				
	Focus: Greetings and formalities Introducing self and others					Focus: Describing self and others				
Term 2	Unit: Family and Pets					Unit: House and Home				
	Focus: Identifying and describing family members Talking about pets					Focus: Describing types of dwellings Describing rooms Describing where things are				
Term 3	Unit: Eating and Drinking*					Unit: Hobbies and Sport				
	Focus: Expressing likes and dislikes Discussing eating and drinking habits At a restaurant					Focus: Talking about sports and hobbies Expressing likes and dislikes				
Term 4	Unit: School Life					Unit: On the Weekend				
	Focus: Exchanging information in the classroom Talking about school routine Finding places within the school					Focus: Discussing weekend activities Making plans				

* The sample unit of work for Eating and Drinking is described in detail on pages 23–33.

2.2 Sample Stage 5 Scope and Sequence Plan

The sample scope and sequence plan below is based on the 200-hour elective course and is a model that could be followed by teachers.

Programming that integrates the essential content in a variety of units of work will enable teachers to cover the scope of the content within the indicative hours. A unit of work will not necessarily cover all the content, but it is recommended that each unit be designed to address at least some content from each Stage 5 outcome.

When planning and programming, teachers may need to transfer outcomes and content across stages to ensure that the needs of all students are addressed, taking into account the multiple entry points of second language learners, and the varying degrees of ability of background speakers.

Plan for Year 9

Weeks	1	2	3	4	5	6	7	8	9	10
Term 1	Unit: Our Local Area Focus: Identifying local landmarks Describing shops Finding the way					Unit: Shopping Focus: Talking about where to shop Asking and paying for items Asking for and giving weights and quantities				
Term 2	Unit: Daily Routine Focus: Describing activities at home and at school Discussing your day					Unit: Getting Help Focus: Identifying parts of the body Talking about sickness and accidents Going to the doctor's Giving advice about health				
Term 3	Unit: School Life Focus: Describing teachers and friends Going on an excursion					Unit: Making Arrangements Focus: Organising an outing to the beach/mountains/country/city Deciding what to bring				
Term 4	Unit: Entertainment – Films and Music Focus: Talking about movies and favourite actors Talking about music and favourite performers					Unit: Holidays Focus: Transport Describing your ideal destination				

Plan for Year 10

Weeks	1	2	3	4	5	6	7	8	9	10
Term 1	Unit: Special Occasions – A Birthday Party* Focus: Writing invitations Organising what to bring Buying clothes Discussing gifts At the birthday party					Unit: Special Days Focus: Describing traditional events Discussing festivals				
Term 2	Unit: Health and Fitness Focus: Talking about a fitness routine A healthy diet					Unit: Getting Help Focus: Reporting lost and found Accidents Getting something fixed				
Term 3	Unit: Entertainment – Television Focus: Using a TV guide Describing favourite programs Describing favourite TV stars Making a commercial					Unit: The Environment Focus: Seasons and the weather City versus country Flora and fauna				
Term 4	Unit: Travelling to Israel Focus: Planning an itinerary Making bookings Sightseeing					Unit: Future Plans Focus: Discussing careers Relationships Talking about feelings				

* The sample unit of work for Special Occasions – A Birthday Party is described in detail on pages 36–44.

3 Advice on Assessment

3.1 Assessment for Learning

The Board's revised syllabuses advocate *assessment for learning*. Assessment that enhances learning recognises that learners use their current understanding to discover, develop and incorporate new knowledge, understanding and skills. *Assessment for learning* helps teachers and students to know if that current understanding is a suitable basis for future learning.

Assessment occurs as an integral part of teaching and learning. Teacher instruction and assessment influence student learning and learning processes. This involves using assessment activities to clarify student understanding of concepts, and planning ways to remedy misconceptions and promote deeper understanding.

Assessment for learning encourages self-assessment and peer assessment. Students can develop and use a range of strategies to monitor and evaluate actively their own learning, as well as the learning strategies they use.

The feedback that students receive from completing assessment activities will help teachers and students decide whether students are ready for the next phase of learning or whether they need further learning experiences to consolidate their knowledge, understanding and skills. Teachers should consider the effect that assessment and feedback have on student motivation and self-esteem, and the importance of the active involvement of students in their own learning.

By integrating learning and assessment, the teacher can choose which aspects of a student's performance to record. These records can be used to monitor the student's progress, determine what to teach next and decide the level of detail to be covered. At key points, such as the end of the year, this information is also available for the teacher to use to form a judgement of the student's performance against levels of achievement. This judgement can be used to inform parents, the next teacher and especially the student, of the student's progress. Consequently, teachers using their professional judgement in a standards-referenced framework are able to extend the process of *assessment for learning* into the assessment of learning.

Principles of assessment for learning

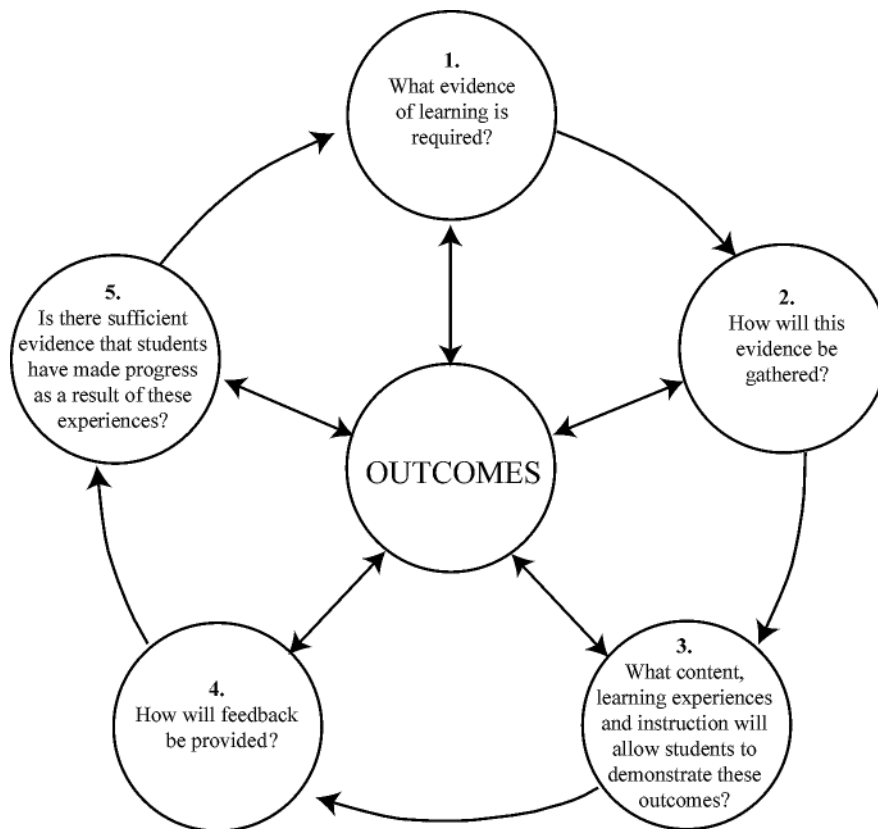

Assessment for learning:

- AP1 emphasises the interactions between learning and manageable assessment strategies that promote learning
- AP2 clearly expresses for the student and teacher the goals of the learning activity
- AP3 reflects a view of learning in which assessment helps students learn better, rather than just achieve a better mark
- AP4 provides ways for students to use feedback from assessment
- AP5 helps students take responsibility for their own learning
- AP6 is inclusive of all learners.

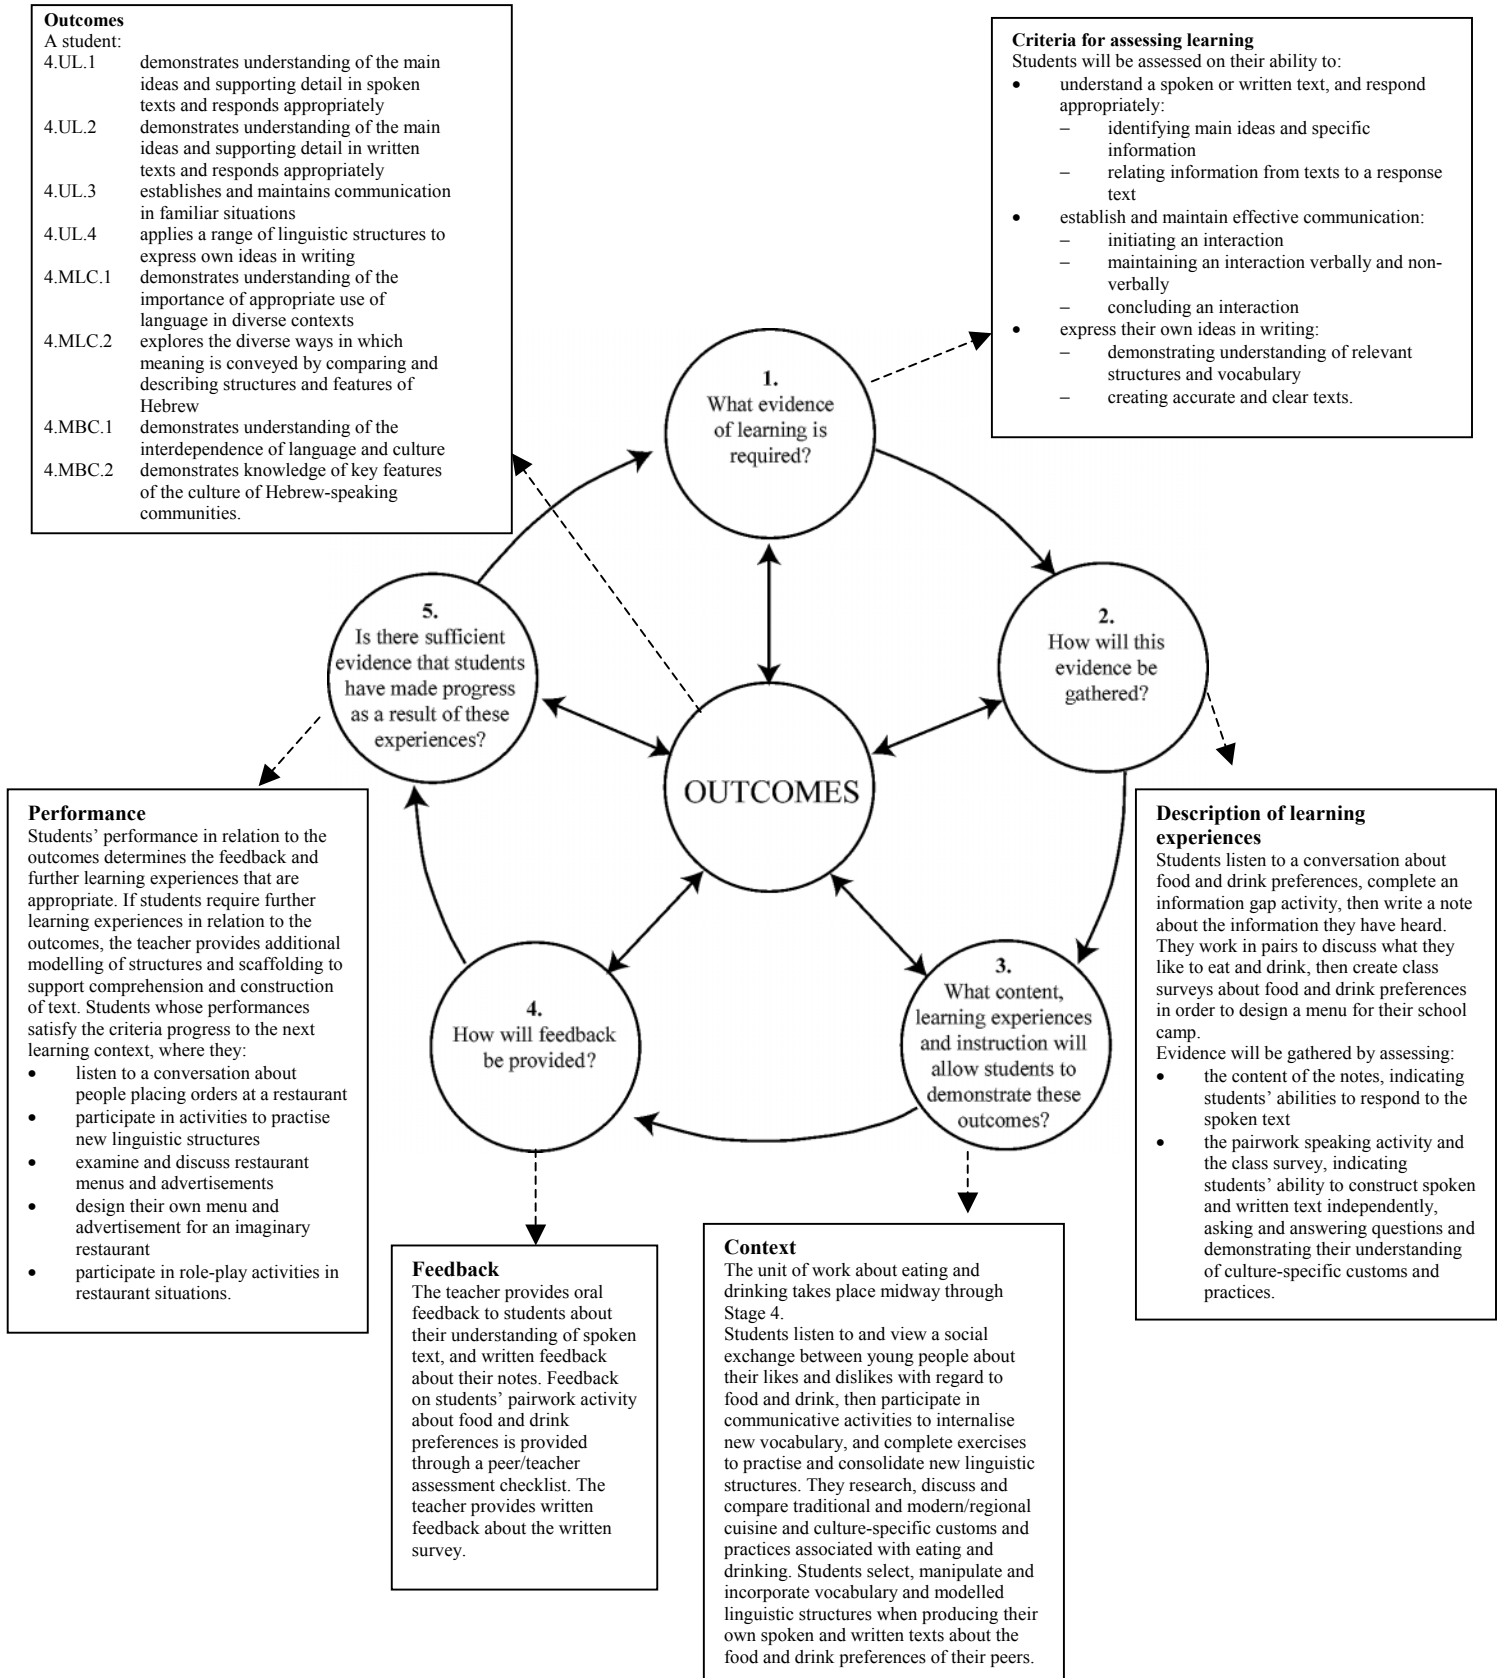

Details on how these principles translate in practice can be found on page 65 of the *Hebrew K–10 Syllabus*. One activity in this document has been annotated to show how the principles of *assessment for learning* feature in that activity. It can be found on page 15–16.

3.2 Planning for Effective Learning and Assessment

The diagram below summarises a model for integrating learning and assessment. It emphasises that outcomes are central to the decisions teachers make about the learning to be undertaken and the evidence of learning that needs to be collected. This evidence enables teachers to determine how well students are achieving in relation to the outcomes and to provide students with feedback on their learning. Evidence of learning assists teachers and students to decide if students are ready for the next phase of learning or if teachers need to adapt programs to provide further learning experiences to consolidate students' knowledge, understanding and skills.

The diagram below shows how this process has been applied in the design of the Stage 4 sample unit of work Eating and Drinking (pages 23–33).

3.3 Designing Effective Learning and Assessment

Designing effective learning experiences requires the selection of activities that develop students' knowledge, understanding and skills and that allow evidence of learning to be gathered. Methods of gathering evidence could include informal teacher observation, questioning, peer evaluation and self-evaluation, as well as more structured assessment activities. Assessment should be an integral part of each unit of work and should support student learning.

When designing assessment activities, teachers should consider whether the activity:

- has explicitly stated purposes that address the outcomes
- is integral to the teaching and learning program
- shows a clear relationship between the outcomes and content being assessed
- allows students to demonstrate the extent of their knowledge, understanding and skills
- focuses on what was taught in class and what students were informed would be assessed
- provides opportunities to gather information about what further teaching and learning is required for students to succeed
- provides valid and reliable evidence of student learning and is fair.

3.4 Annotated Assessment for Learning Activity

The *Assessment for Learning Principles* provide the criteria for judging the quality of assessment materials and practices. The Stage 4 sample assessment activity, Listening and Responding, has been annotated to show these principles.

Sample assessment for learning activity: Listening and Responding

Syllabus outcomes are identified, with targeted knowledge, understanding and skills.
AP1, AP2, AP3

The activity forms an integral part of the learning process and builds on previous experiences.
AP1, AP3

Context

This is an introductory activity from a unit of work, midway through Stage 4, about eating and drinking. Students have listened to conversations about food and drink preferences. They have participated in communicative activities to internalise vocabulary, and have been given exercises to practise and consolidate their knowledge of new structures. They have learnt vocabulary relating to food and drink and they can identify what they like and dislike.

Outcomes

A student:

- 4.UL.1 demonstrates understanding of the main ideas and supporting detail in spoken texts and responds appropriately
- 4.UL.4 applies a range of linguistic structures to express own ideas in writing
- 4.MLC.1 demonstrates understanding of the importance of appropriate use of language in diverse contexts
- 4.MLC.2 explores the diverse ways in which meaning is conveyed by comparing and describing structures and features of Hebrew.

The activity has a clear purpose and is inclusive of all learners.
AP1, AP6

Description of activity

The class listens to a group of young people discussing their food and drink preferences. Students then complete an information-gap activity where they match the name of the speaker to a food/drink item. In order to prepare a lunch menu, students use this information to write a note in Hebrew as a reminder of what each individual prefers. They need to mention the name of the person, the food/drink item and state whether the person likes or dislikes it.

Criteria for assessing learning

(These criteria would normally be communicated to students with the task or activity.)

Students will be assessed on their ability to:

- understand the spoken text, by identifying:
 - the main ideas
 - specific information
- create accurate and clear texts, using:
 - correct word order
 - subject/verb agreement
 - choice of appropriate vocabulary
- respond to the conversation they have heard, by:
 - providing accurate information in note form
 - selecting and incorporating modelled linguistic structures
 - writing a series of linked sentences.

Criteria for assessing learning and marking guidelines relate to the outcomes and are clearly expressed in terms of the knowledge, understanding and skills required for the activity. AP2, AP4

Guidelines for marking

The following guidelines for marking show one approach to assigning a value to a student’s work. Other approaches may be used that better suit the reporting process of the school. Categories, marks, grades, visual representations or individual comments/notations may all be useful.

Range	A student in this range:
High	<ul style="list-style-type: none"> • understands the main ideas and supporting detail in spoken texts • selects information from a spoken text to express own ideas using modelled linguistic structures and provides additional details • creates coherent and original text using relevant structures and vocabulary and applying specific patterns and rules in word construction, word order and sentence structure
Satisfactory	<ul style="list-style-type: none"> • understands the main ideas and some supporting detail in spoken texts • selects information from a spoken text to express own ideas using modelled linguistic structures • creates original text using relevant structures and vocabulary and applying some specific patterns and rules in word construction, word order and sentence structure
Progressing	<ul style="list-style-type: none"> • understands some of the main ideas and/or isolated detail in spoken texts • selects some information from a spoken text to express own ideas, relying on teacher support and modelled linguistic structures • creates text using a limited range of vocabulary and structures

The activity provides practical and meaningful ways for students to use feedback from assessment. AP5

Feedback

Students will receive written feedback from the teacher. Comments will focus on their ability to:

- identify main ideas and supporting detail in a spoken text
- apply relevant structures and vocabulary to the creation of text
- incorporate specific detail from a spoken text to express their own ideas in writing.

Future directions

If evidence indicates that students have experienced difficulty with the listening and responding activity, teachers may need to adjust subsequent learning experiences through additional modelling of structures and scaffolding to support the construction of text. Students whose performances satisfy the criteria progress to the next activity, where they participate in a role-play conversation about their food and drink preferences.

The activity has clear links to learning goals. AP1

Resources

- The recording of the listening passage
- The information-gap activity worksheet

3.5 Sharing Learning and Assessment Intentions

Students must be aware of what they need to do to demonstrate evidence of learning. This information could be conveyed informally or formally by the teacher, as appropriate for the learning activity. Students should be informed of the criteria that will be used to assess their learning. They should be clear about the meaning of the language used, and the subject-specific terminology. They also need to be clear about any sources or stimulus material that are appropriate to the activity.

It may be helpful to give to students models of good responses and templates or procedures to help them demonstrate the extent of their knowledge, understanding and skills.

3.6 Effective Feedback to Students

The aim of feedback is to communicate to students how well their knowledge, understanding and skills are developing in relation to the outcomes. Feedback enables students to recognise their strengths and areas for development, and to plan with their teacher the next steps in their learning. They are then given opportunities to improve and develop further their knowledge, understanding and skills.

Teacher feedback about student performance is essential for students and is integral to the teaching and learning process. Student self-reflection and peer evaluation can also provide valuable feedback. Students should be provided with regular opportunities to reflect on their learning.

Feedback should:

- focus on the activity and what was expected
- be constructive, providing meaningful information to students about their learning
- correct misunderstandings
- identify and reinforce students' strengths and state clearly how students can improve.

Forms of feedback include:

- oral discussion with class, groups or individual students
- written annotations
- general comments to the class about those aspects of the activity in which students excelled and those aspects that still need to be addressed
- examples of good responses
- peer evaluation and self-evaluation.

3.7 Recording Evidence for Assessment

Recording student performance needs to be manageable. Teachers should make decisions about which aspects of student performance in an activity should be recorded, and in what format. The teacher can use this information to ascertain students' progress, what needs to be taught next and to what level of detail, and to form a judgement of student achievement at key points.

Record-keeping should reflect the reporting processes of the school and may take the form of individual comments or notations about, marks or grades for, or visual representations of the activities.

A scale such as the one below may be a useful way to summarise the extent of students' learning. This example shows how individual students performed on the same assessment activity.

Student	Activity – Listening and Responding	date .../.../...
A		✓
B	✓	
C		✓
D	✓	
E		✓
F	✓	
	Progressing	Satisfactory High

This method can be adapted to capture evidence of an individual student's strengths and weaknesses in various elements of one activity, or the performance of a particular student, class, group or cohort of students, across a range of assessment activities.

4 Programming Units of Work

The *Hebrew K–10 Syllabus* promotes an approach to programming that has the outcomes as the focal point. The sample units of work in section 5 have been developed using the following process:

Step 1 Identify outcomes

Identify the outcomes that will be addressed in the unit. It is *recommended* that all outcomes for the stage be addressed. In some cases outcomes from other stages may also be included.

Step 2 Decide on the context or theme and topics, and focuses of the unit of work

Once the outcomes have been selected, the theme, topics and focuses of the unit should be determined.

Step 3 Select the relevant syllabus content

Learn about and *learn to* statements relating to the outcomes are selected and organised into a logical sequence according to the learning context. The amount of content selected should be manageable in the time allocated to the unit. In some cases content from other stages may also be included.

Step 4 Decide on the evidence of learning

Identify the specific evidence of learning to be observed through the teaching, learning and assessment activities. This evidence will enable judgements to be made on achievement in relation to the outcomes and identified content.

Step 5 Plan the teaching, learning and assessment activities

Assessment for learning activities occur as a normal part of the teaching process. Teachers plan the most suitable teaching, learning and assessment activities for the selected content, ensuring that they will provide the desired evidence of learning determined in Step 4. Teaching, learning and assessment activities should be student-centred, promoting the development of knowledge, understanding and skills. Teachers are encouraged to include creative and stimulating teaching and learning experiences that present the content in a meaningful context for students.

Step 6 Plan feedback opportunities

Feedback provides students with the necessary information and direction to progress their learning, and occurs normally through good teaching practice, mostly in an informal manner. However, when planning units of work teachers should consider how to maximise feedback in the context of the teaching, learning and assessment activities and how the feedback contributes to student learning.

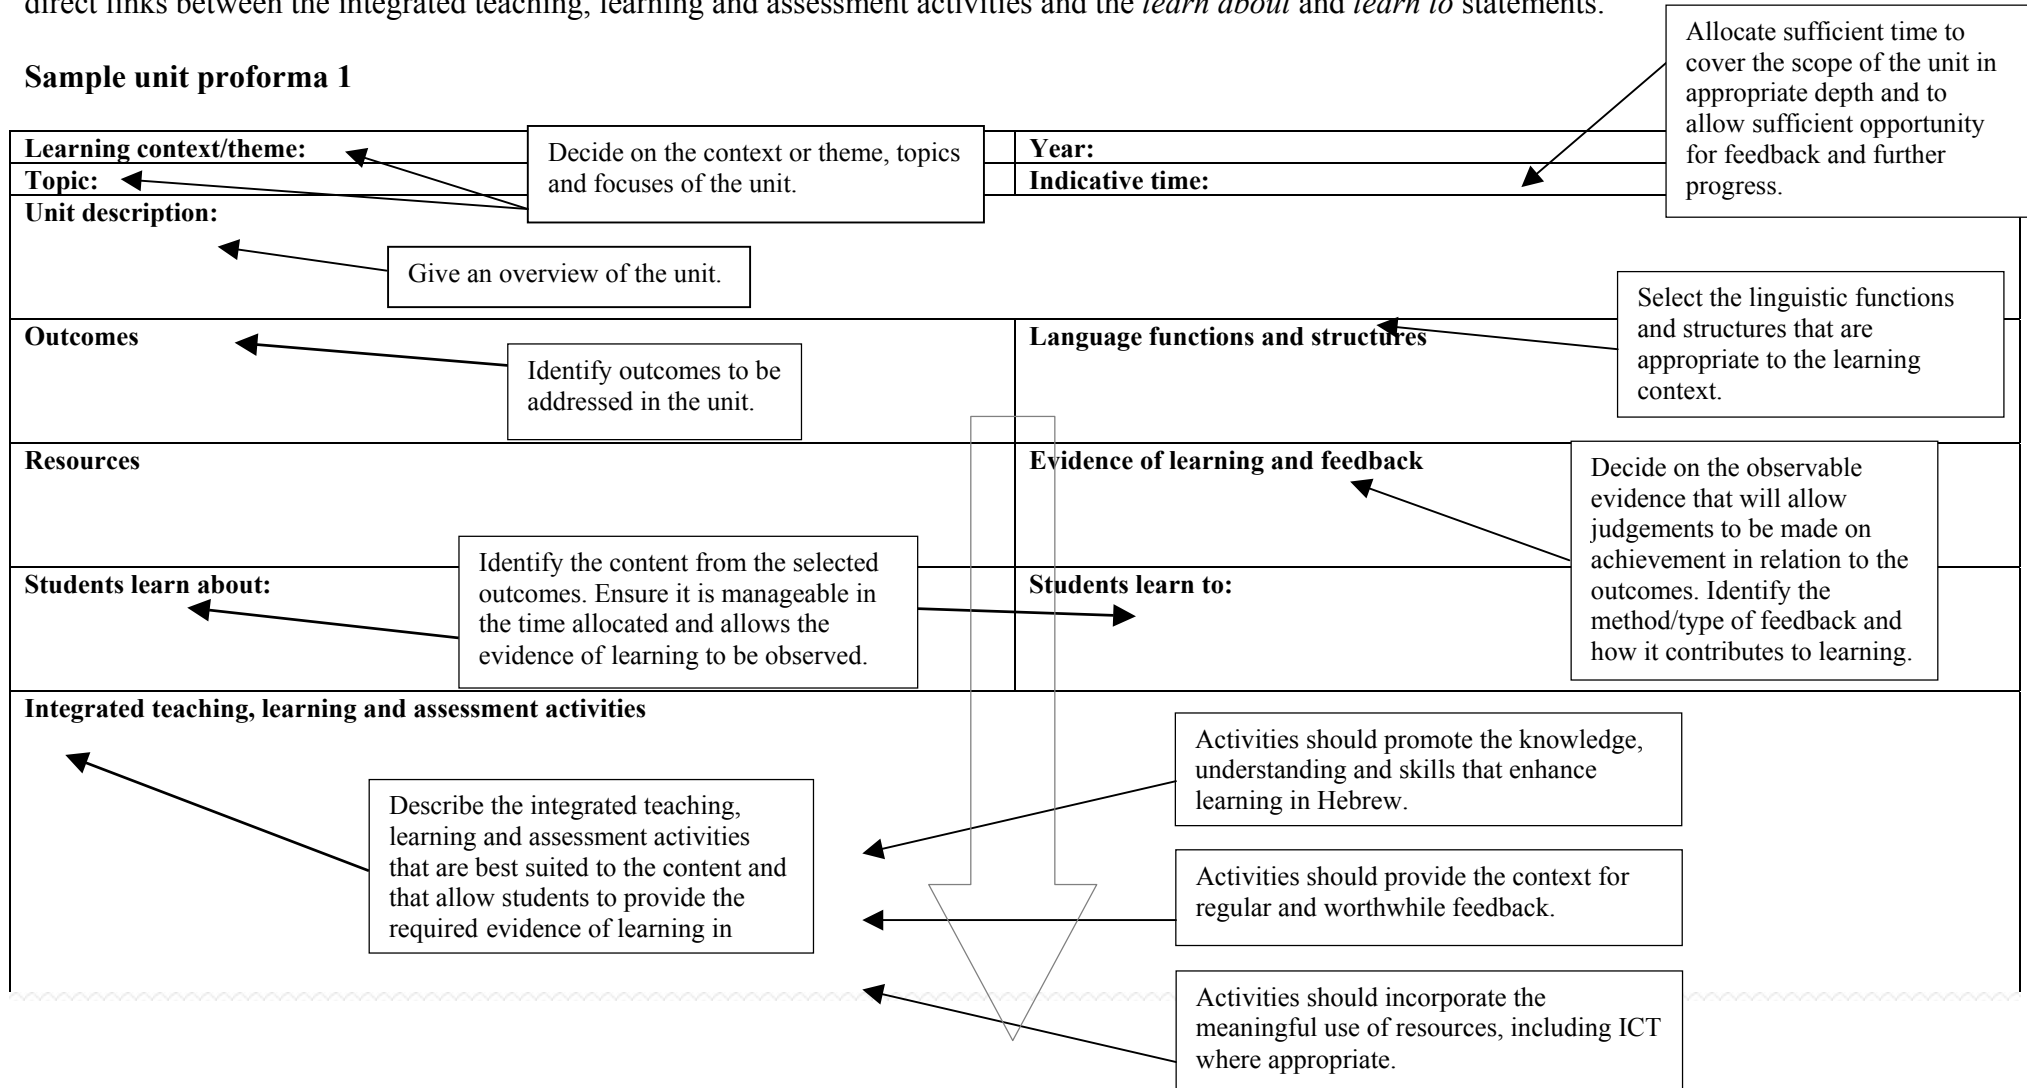

Step 7 Plan opportunities for teacher's reflection and evaluation

As teachers progress through the programming process, it is important to reflect on previous steps and to evaluate the degree to which the unit has remained focused on the outcomes. Identifying the evidence of learning early in the process will assist in this. After the unit has been implemented it is also necessary to evaluate the degree to which students have progressed as a result of the experiences and what should be done next to assist them in their learning.

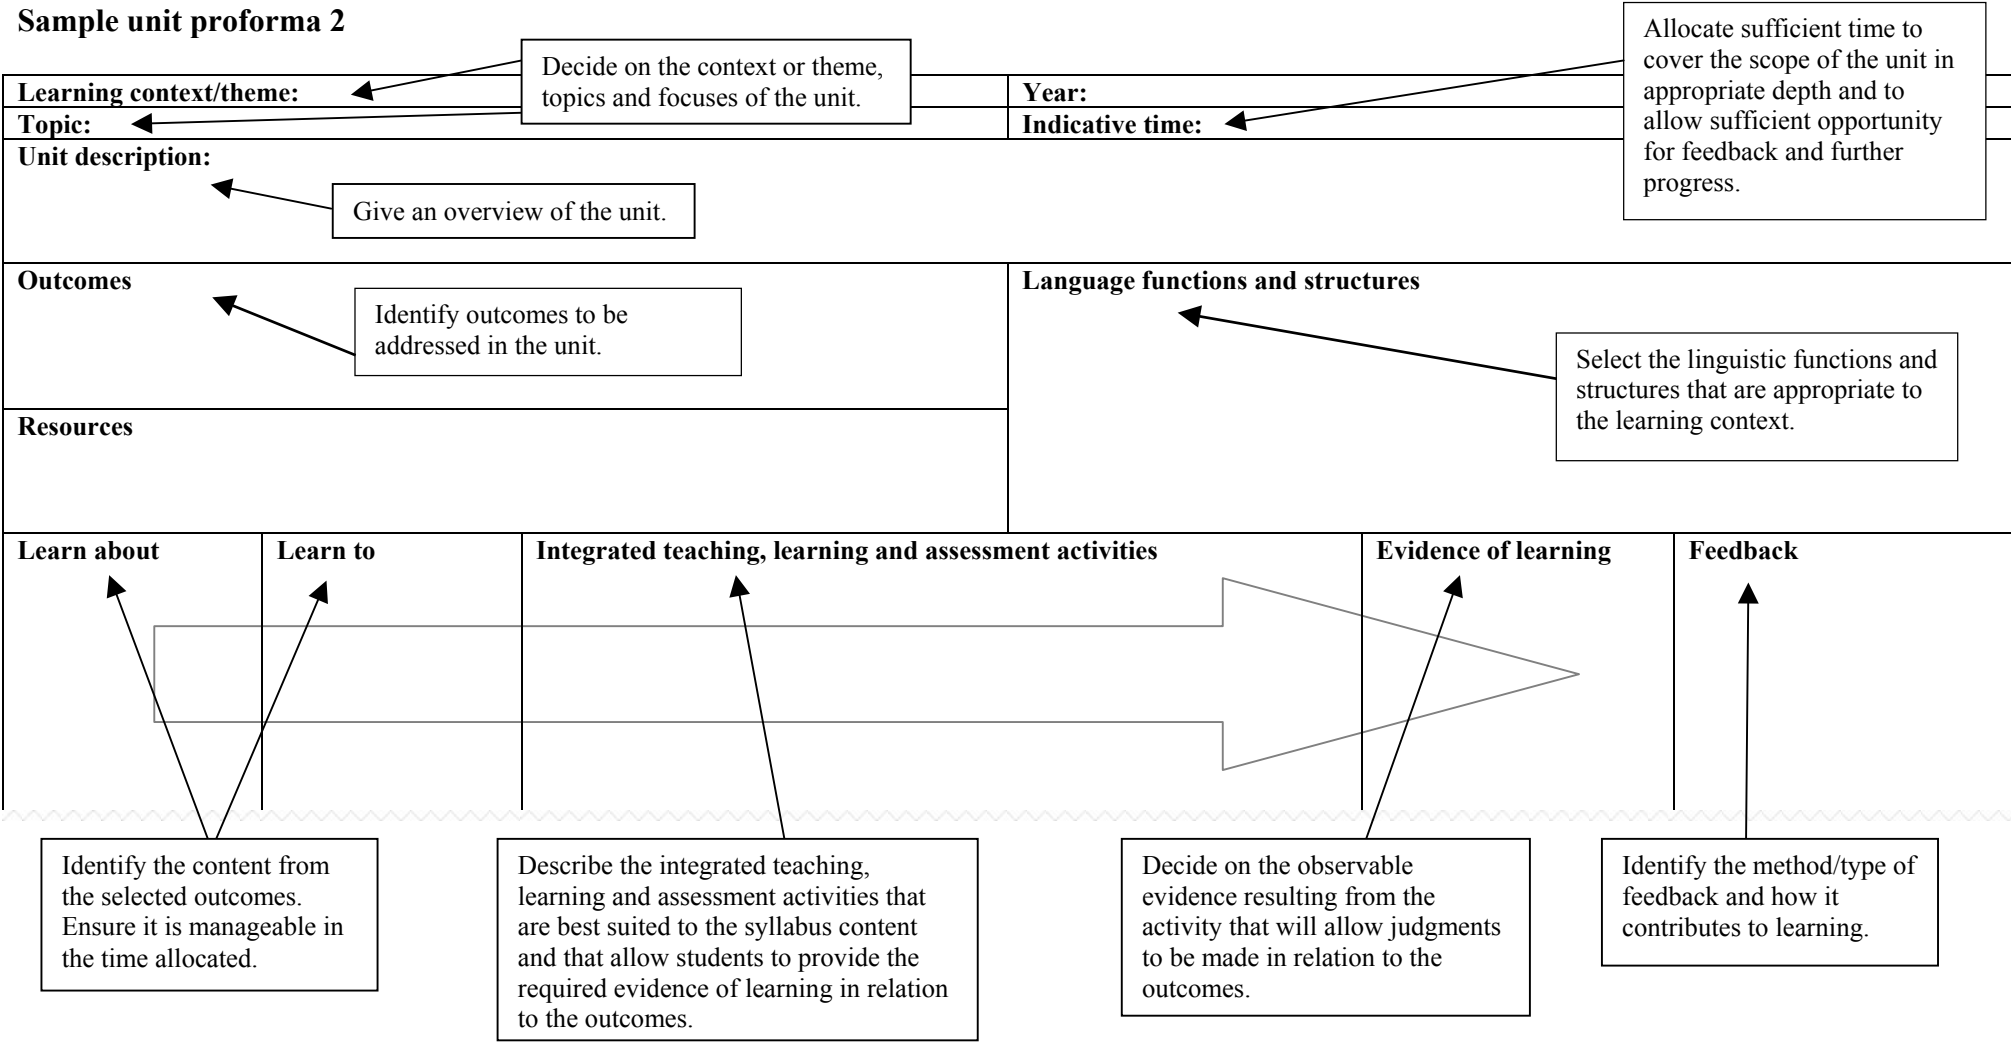

4.1 Sample Unit Proformas

Schools should design unit proformas that best meet their needs and circumstances. The samples provided have been annotated to highlight the characteristics of each section. Sample unit proforma 2 is used in this document to present the Stages 4 and 5 sample units of work. It demonstrates the direct links between the integrated teaching, learning and assessment activities and the *learn about* and *learn to* statements.

Sample unit proforma 1

Sample unit proforma 2

5 Sample Units of Work

The sample units of work that follow are designed to assist teachers in planning for the implementation of the *Hebrew K–10 Syllabus*. The units provide programming ideas for selected syllabus content.

The sample units show ways in which teachers can meet the needs, interests and abilities of their students, while assessing their progress towards a demonstration of outcomes. The sample units also illustrate ways in which assessment activities may be integrated into the teaching and learning sequence. They will assist teachers to understand the importance of:

- being explicit about the outcomes and content they are addressing
- being explicit about the evidence required to demonstrate student learning
- providing meaningful feedback to students
- adapting teaching and learning programs to students' demonstrated needs
- having a sound basis for modifying future teaching and learning programs (in light of students' demonstrated needs).

The sample units provide opportunities for students to engage in questioning and dialogue, self-assessment, peer assessment and reflection. Through these activities students can become clear about their own learning, understanding and needs.

Note that the assessment activities are described here in some detail to illustrate the process of *assessment for learning*. Teachers would not provide this level of detail in day-to-day classroom situations.

5.1 Stage 4 Sample Unit of Work: Eating and Drinking

Learning context: Eating and Drinking	
Topic: My favourite foods and drinks	Indicative time: 4–5 weeks [Extended context (At a Restaurant): 4–5 weeks]
<p>Unit description: Learning in this unit focuses on developing the knowledge, understanding and skills that will enable students to discuss eating and drinking. Students acquire vocabulary, expressions and language structures within this context. Student activities relate to the <i>learn about</i> and <i>learn to</i> statements and form the basis of the unit of work. Students listen to, read and respond to texts and learn to incorporate modelled linguistic structures in order to produce a series of linked sentences.</p> <p>The <i>assessment for learning</i> activity in bold on page 27 has been described in detail at the end of the unit.</p>	
<p>Outcomes A student:</p> <p>4.UL.1 understands the main ideas and supporting detail in spoken texts and responds appropriately</p> <p>4.UL.2 understands the main ideas and supporting detail in written texts and responds appropriately</p> <p>4.UL.3 establishes and maintains communication in familiar situations</p> <p>4.UL.4 applies a range of linguistic structures to express own ideas in writing</p> <p>4.MLC.1 demonstrates understanding of the importance of appropriate use of language in diverse contexts</p> <p>4.MLC.2 explores the diverse ways in which meaning is conveyed by comparing and describing structures and features of Hebrew</p> <p>4.MBC.1 demonstrates understanding of the interdependence of language and culture</p> <p>4.MBC.2 demonstrates knowledge of key features of the culture of Hebrew-speaking communities.</p>	<p>Language functions and structures</p> <ul style="list-style-type: none"> Identifying food and drink vocabulary אוכל, מאכל, מזון – בשר, דגים, ביצים, לחם, פירות, ירקות, מוצרי חלב שתייה - תה, קפה, מים, חלב, מיץ, שוקו, יין Expressing likes and dislikes אני אוהב ל.../לא אוהב ..., האוכל האהוב עלי הוא...לא/מוצא חן בעיני, אני הכי אוהב Finding out what others like and dislike מה אתה אוהב/לא, מעדיף/לא Describing food and drink טעים/לא, מלוח, מתוק, חמוץ Asking and saying what you eat and drink מה אתה אוכל ושותה? אני אוכל ... ושותה... Ordering food and drink in restaurants מלוח לכב סינמזה - תלונגהל, מלשל, לבקל, שקבל, להזמין תפריט, מנה ראשונה, 'שניה, עקרית, קינחה, שתייה, קבלה, השמות של כל הארוחות

5.1.1 Sample assessment for learning activity: Listening and Responding

Context

This is an introductory activity from a unit of work, midway through Stage 4, about eating and drinking. Students have listened to conversations about food and drink preferences. They have participated in communicative activities to internalise vocabulary, and have been given exercises to practise and consolidate their knowledge of new structures. They have learnt vocabulary relating to food and drink, and they can identify what they like and dislike.

Outcomes

A student:

- 4.UL.1 demonstrates understanding of the main ideas and supporting detail in spoken texts and responds appropriately
- 4.UL.4 applies a range of linguistic structures to express own ideas in writing
- 4.MLC.1 demonstrates understanding of the importance of appropriate use of language in diverse contexts
- 4.MLC.2 explores the diverse ways in which meaning is conveyed by comparing and describing structures and features of Hebrew.

Description of activity

The class listens to a group of young people discussing their food and drink preferences. Students then complete an information-gap activity where they match the name of the speaker to a food/drink item. In order to prepare a lunch menu, students use this information to write a note in Hebrew as a reminder of what each individual prefers. They need to mention the name of the person, the food/drink item and state whether the person likes or dislikes it.

Criteria for assessing learning

(These criteria would normally be communicated to students with the task or activity.)

Students will be assessed on their ability to:

- understand the spoken text, by identifying:
 - the main ideas
 - specific information
- create accurate and clear texts, using:
 - correct word order
 - subject/verb agreement
 - choice of appropriate vocabulary
- respond to the conversation they have heard, by:
 - providing accurate information in note form
 - selecting and incorporating modelled linguistic structures
 - writing a series of linked sentences.

Guidelines for marking

The following guidelines for marking show one approach to assigning a value to a student's work. Other approaches may be used that better suit the reporting process of the school. Categories, marks, grades, visual representations or individual comments/notations may all be useful.

Range	A student in this range:
High	<ul style="list-style-type: none">• understands the main ideas and supporting detail in spoken texts• selects information from a spoken text to express own ideas, using modelled linguistic structures and providing additional details• creates clear and original text using relevant structures and vocabulary and applying specific patterns and rules in word construction, word order and sentence structure
Satisfactory	<ul style="list-style-type: none">• understands the main ideas and some supporting detail in spoken texts• selects information from a spoken text to express own ideas, using modelled linguistic structures• creates original text using relevant structures and vocabulary and applying some specific patterns and rules in word construction, word order and sentence structure
Progressing	<ul style="list-style-type: none">• understands some of the main ideas and/or isolated details in spoken texts• selects some information from a spoken text to express own ideas, relying on teacher support and modelled linguistic structures• creates text using a limited range of vocabulary and structures.

Feedback

Students will receive written feedback from the teacher. Comments will inform students about their ability to:

- identify the main ideas and supporting detail in a spoken text
- apply relevant structures and vocabulary to the creation of text
- incorporate specific detail from a spoken text to express their own ideas in writing.

Future directions

If evidence indicates that students have experienced difficulty with the listening and responding activity, teachers may need to adjust subsequent learning experiences through additional modelling of structures and scaffolding to support the construction of text. Students whose performances satisfy the criteria progress to the next activity, where they participate in a role-play conversation about their food and drink preferences.

The recording of the listening passage
The information-gap activity worksheet

5.2 Stage 5 Sample Unit of Work: Special Occasions – A Birthday Party

Learning context: Special Occasions	
Topic: A birthday party.	Indicative time: 4–5 weeks [Extended context (At the birthday party): 2–3 weeks]
<p>Unit description: Learning in this unit focuses on developing students’ skills, knowledge and understanding within the context of planning a birthday party. Students acquire vocabulary, expressions and language structures within this context. Student activities relate to the <i>learn about</i> and <i>learn to</i> statements and form the basis of the unit of work. Students listen, read and respond to texts and learn to experiment with linguistic structures in order to express their own ideas.</p> <p>The <i>assessment for learning</i> activity in bold on page 43 has been described in detail at the end of the unit.</p>	
<p>Outcomes A student:</p> <p>5.UL.1 selects, summarises and analyses information and ideas in spoken texts and responds appropriately</p> <p>5.UL.2 selects, summarises and analyses information and ideas in written texts and responds appropriately</p> <p>5.UL.3 uses Hebrew by incorporating diverse structures and features to express own ideas</p> <p>5.UL.4 experiments with linguistic patterns and structures in Hebrew to convey information and to express own ideas</p> <p>5.MLC.1 demonstrates understanding of the nature of languages as systems by describing and comparing linguistic features across languages</p> <p>5.MLC.2 uses linguistic resources to support the study and production of texts in Hebrew</p> <p>5.MBC.1 explores the interdependence of language and culture in a range of texts and contexts</p> <p>5.MBC.2 identifies and explains aspects of the culture of Hebrew-speaking communities in texts.</p>	<p>Language functions and structures</p> <ul style="list-style-type: none"> • Making arrangements, inviting someone to a party, responding to invitations הזמנה, להזמין, מוזמן, לארגן, לסדר, נשמח לבוא, מצטער, לא יכול • Initiating and completing a shopping transaction אפשר לקבל, למדוד, לראות, לקנות, לשלם • Asking for and choosing an item of clothing אפשר למדוד את השמלה לפני שאני קונה אותה, • Asking for and giving specific information (eg size, colour) אפשר לקבל נעליים בצבע, במספר בסגנון וכו • Expressing opinions about items prices (cheap/expensive), sizes, colours יקר- ביוקר, זול – בזול, צר, רחב, קצר, ארוך, גדול, קטן, יפה, מכוער, מוצא/לא מוצא חן בעיני • Choosing and paying for an item אפשר לשלם, אני רוצה לשלם, כמה זה עולה, • Giving compliments זה יפה, זה לא יפה, לא/מתאים לך, • Describing party activities לאכול, לשתות, לשחק, לדבר, לרקוד, לראות סרט/וודיו, להקשיב למוזיקה • Expressing gratitude תודה רבה על, אני מודה לך, אני רוצה להודות לך

5.2.1 Sample assessment for learning activity: Reading and Responding

Context

This activity occurs in the middle of a unit of work that students undertake midway through Stage 5. Students are organising a birthday party for a friend. They have made plans for the party that have included sending out invitations and organising what to bring to the party. They have participated in role-play activities in shopping situations, to choose outfits to wear to the party. They have learnt vocabulary relating to gift ideas and participated in activities that have enabled them to internalise structures needed to state opinions. They now respond to an email from a friend, who makes suggestions regarding the birthday gift.

Outcomes

A student:

- 5.UL.2 selects, summarises and analyses information and ideas in written texts and responds appropriately
- 5.UL.4 experiments with linguistic patterns and structures in Hebrew to convey information and to express own ideas
- 5.MLC.1 demonstrates understanding of the nature of languages as systems by describing and comparing linguistic features across languages
- 5.MLC.2 uses linguistic resources to support the study and production of texts in Hebrew.

Description of activity

Students are trying to decide what to buy their friend for his/her birthday. They receive an email from a friend, with detailed suggestions for possible gift ideas. Students read the email and write an email in response, giving an opinion about each of the gift ideas and then expressing a preference.

Criteria for assessing learning

(The criteria would normally be communicated to students with the task or activity.)

Students will be assessed on their ability to:

- select, summarise and analyse information in a written text, by:
 - distinguishing between main points, specific and supporting detail
- convey information and express own ideas, by:
 - selecting and incorporating particular linguistic structures for a specific purpose
- demonstrate effective communication in a clear and cohesive text, by:
 - applying grammatical rules and conventions consistently
 - making linguistic choices to enhance intended meaning.

Guidelines for marking

The following guidelines show one approach to assigning a value to a student's work. Other approaches may be used that better suit the reporting process of the school. Categories, marks, grades, visual representations or individual comments/notations may all be useful.

Range	A student in this range:
8–10 (High)	<ul style="list-style-type: none">• selects information from the written text and responds using relevant detail• creates an effective text using a range of linguistic patterns and structures to convey information and express own ideas for a specific purpose• applies grammatical rules and conventions to the development of clear and cohesive text.
4–7 (Satisfactory)	<ul style="list-style-type: none">• selects information from the written text and responds using some relevant detail• creates a text using some linguistic patterns and structures to convey information and express own ideas for a specific purpose• applies grammatical rules and conventions to the development of cohesive text.
1–3 (Progressing)	<ul style="list-style-type: none">• selects some details from the written text and responds, relying on teacher support• creates text using a limited range of linguistic patterns and structures to convey information and express own ideas• applies grammatical rules and conventions to the development of text, relying on teacher support and modelled linguistic structures.

Feedback

Students will receive written feedback from the teacher. Comments will inform students about their ability to:

- select, summarise and analyse information for use in a response
- convey information and express ideas in Hebrew in an email
- use particular vocabulary and structures to give opinions about gift ideas and express a preference.

Future directions

If evidence indicates that students have experienced difficulty with the activity, teachers may need to adjust learning experiences through additional modelling of structures, and scaffolding to support comprehension of written text and construction of the written response. Students whose performances satisfy the criteria progress to related activities, where, for example, they role-play the purchase of a gift, plan an imaginary birthday party, participate in role-play at the party, then write a letter about the party to a friend, such as a class member who is currently on exchange in Israel.
